Who We Are

Founded in 1950, CAPP is a trusted partner for industrial, commercial, and institutional customers seeking reliable MRO, engineering, and lifecycle solutions. For over seven decades, we've helped organizations protect uptime, control costs, and extend the life of critical systems through deep technical expertise and responsive service.

What We Offer

Access to **350+**
Engineers

2+ Million
SKU's Ready to Ship

20+ Million

2+ Billion
Value of Stock

Products We Supply

New & Never Used

Factory OEM components from leading manufacturers, delivering reliable performance, quality assurance, and fast availability.

Surplus

In-stock current parts including PLCs, HMIs, motors, drives, and electrical components offering cost savings with industry-leading lead times.

Obsolete & Refurbished

Hard-to-find and discontinued components that keep legacy automation and electronic systems running longer, helping avoid costly upgrades.

Product Categories

BAS & HVAC

Automation

Instrumentation

Electrical

Combustion

MRO

Our Value

Extend Equipment Lifecycle

Cost-effective alternatives and verified substitutes help avoid premature capital replacement while maintaining performance.

Unlock Cost Optimization

Automated procurement tools and an extensive supplier network reduce OEM dependency, administrative burden, and total MRO cost.

Access Obsolete & Hard-to-Find Parts

Global sourcing capabilities to locate discontinued and legacy components, keeping critical systems operational longer.

Increase Operational Uptime & Reliability

Downtime is reduced through rapid access to in-stock parts with same-day fulfillment, paired with emergency repair support to maintain continuous operations.

Industries We Support

Industrial Manufacturing

- Chemical and Petrochemical
- Plastics
- Food and Beverage
- Laundry
- Power Generation
- Oil and Gas
- Mining
- Pulp and Paper
- Packaging
- Agriculture
- Pharmaceutical
- Textiles
- Vehicle Manufacturing
- Transportation

Commercial & Institutional

- Colleges and Universities
- School Districts
- Restaurants
- Data Centers
- Hospitals and Medical Centers
- Nursing Homes
- Contractors and Service Companies
- Construction
- Retail Stores and Malls
- Hotels and Hospitality
- Property Management Firms

Government

- Municipalities
- Wastewater Treatment
- Correctional Facilities
- Utilities and Infrastructure
- Emergency Services
- Transit and Port Authorities
- Federal Departments
- VA Hospitals
- General Services Administration (GSA)
- U.S. Postal Service

Repair Solutions

All CAPP repair solutions are backed by a 2-year warranty, with the option to extend coverage to 3 years for added peace of mind. Leveraging deep industrial automation expertise and proven repair processes, CAPP delivers dependable repair solutions that you can trust every day.

Our customer-focused teams support you at every stage of the repair process, ensuring clear communication, responsive service, and lasting confidence in the performance of your repaired equipment.

CAPP's repair services are built to get your critical assets back online quickly. With state-of-the-art testing capabilities and a team of experienced technicians, we handle a wide range of industrial automation, electrical, and control system repairs—accurately, efficiently, and reliably.

& More!

The Repair Process

STEP 1

Describe Your Issue

Provide basic details about the failure or performance concern.

STEP 2

Generate a Packing List

Receive clear documentation to ensure accurate intake and tracking.

STEP 3

Ship to CAPP

We cover inbound shipping for repair evaluation - free of charge!

STEP 4

Approve Pricing & Timeline

Review repair recommendations, costs, and turnaround time before work begins.

STEP 5

Receive Your Repaired Equipment

Fully tested, quality-assured, and ready to return to service.

Our Capabilities

Data-Driven Sourcing & Parts Intelligence

Our data-powered Parts Finder identifies the lowest-cost, fastest-available options using real-time market and inventory insights helping you reduce downtime and procurement costs.

- Technology-enabled sourcing across OEM, surplus, and aftermarket channels
- Real-time pricing and availability
- Verified substitutes with OEM-equivalent performance
- Fit, Form & Function alternatives that meet or exceed factory specifications

Extensive Supplier Network & Surplus Access

We leverage a global supplier network and surplus inventory to source rare, obsolete, and discontinued components others can't find.

- Access to hard-to-source and end-of-life parts
- Expanding product availability across automation, electrical, HVAC, and controls
- Market-leading warranty protection and rigorous quality assurance

Robust Digital & eProcurement Solutions

Our digital platform simplifies buying while improving accuracy, speed, and visibility.

- Real-time inventory visibility and instant quotes
- Quote-free purchasing and frictionless online ordering
- PunchOut integration with Ariba, Coupa, and leading eProcurement systems
- API ordering solutions for automated purchasing workflows

Results: fewer errors, faster ordering, and streamlined procurement operations.

Asset Lifecycle Analytics

We help you stay ahead of risk with proactive analytics and lifecycle intelligence.

- Obsolescence-tracking algorithms monitor manufacturer lifecycle changes
- Proactive equipment assessments to identify risk before failures occur
- Customized upgrade, replacement, and modernization strategies
- Quarterly or annual Custom Savings Reports demonstrating measurable value

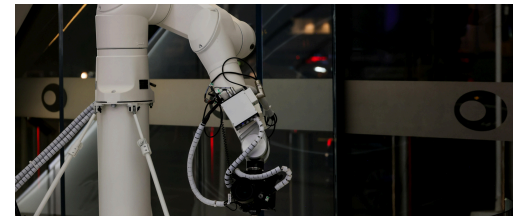

Sell Us Your Parts Program

Turn surplus inventory into cash quickly and sustainably.

- Removes outdated, excess, or slow-moving stock
- Frees up valuable storage space
- Improves cash flow through rapid asset liquidation
- More sustainable than disposal
- We cover shipping for a hassle-free experience

Our *Sell Us Your Parts* Program makes it easy to unlock tied-up capital with tailored, efficient solutions.

Robotics

Beyond parts, we support uptime, recovery, and long-term reliability.

- Refurbished Integrator-Ready robots
- Robot refurbishment programs
- Preventative maintenance programs
- Line startup and emergency support
- Integrated repair services and after-service support
- Automation & electrical parts supply

Let's Get Started

Schedule a comprehensive assessment today.

We analyze your equipment, flag obsolescence risks early, and recommend practical solutions that save time, lower costs, and minimize downtime.
